Scaling Rules and Event-triggered Tasks

Scaling Activities

Lifecycle Hooks

Each time a scaling rule is executed, or you manually add instances to or remove instances from the scaling group, a scaling activity is triggered. You can create notification rules to enable Auto Scaling to notify you of any changes in the scaling group. This way, you can obtain dynamic information about the scaling group and manage the group at the earliest opportunity.

Search by scaling activity ID. Separate multiple IDs with commas (,).

Search

Scaling Activity ID	Status (All) ▾	Instances After Scaling	Start Time	End Time	Description
i-14vbbk9aaah5byheps0u	<div>Rejected</div> <div>View Rejection Reason</div>	-	Nov 9, 2023 12:42 PM	Nov 9, 2023 12:42 PM	Invalid scalingRule
i-14vbbk9aaah5bujcho2k	<div>Successful</div>	3	Nov 9, 2023 12:34 PM	Nov 9, 2023 12:34 PM	Add "3" ECS instances
